Ultrasonic Microphone Jammer

KOL 15

Ultrasonic jammer KOL 15 is a powerful system that designed to prevent eavesdropping or unauthorized recording using the mobile phone's / tablet's microphone.

KOL 15 can simultaneously neutralize the microphones of up to 15 mobile phones and 2 tablets in the same time, by generate ultrasonic sound which effectively protects meetings held in the room and leaves them discreet.

The system works by connecting to 220v electricity as well to an internal battery that allows it to operate for 10 hours continuously, a fact that makes the system portable without any need of connectivity to electricity. The battery status is displayed on a LED screen.

Main functions:

1. Ultrasonic suppression: 56 ultrasonic emitters of 120dB of power each create a powerful ultrasonic barrier for microphones of all the modern phones such as iPhone, Samsung, and other brands, which allows you to suppress the operation of such devices even in silent mode!
2. Remote control: the supplied remote control simplifies the operation of the KOL 15 device.

specifications:

Power of one ultrasonic radiator – 12dB
Acoustic amplifier output power – 3W
Device dimensions – 45cm x 30cm x 32cm
Weight: 5 kg

10 Aholiav St', Ramat-Gan, Israel
