HIDDEN CAMERA DETECTOR

OR 1

Professional Hidden Camera Detector

OR 1 is a professional hidden camera detector designed to detect any type of visible or hidden camera at distance of up to 50 meters and at an angle of up to 40°.

The uniqueness of the OR 1 is a combination between four abilities:

- High quality binoculars with 6.5x21 magnification and large focusing range, allows examining objects in detail at distances up to 50m with detection angle of 40°.
- Electronic system contains two special LED, green and red, which transmit a special light frequency that identifies any type of camera lens, visible or hidden.

  When a camera lens is detected, the light reflection from the lens will sparkle.

Technical Specifications:

Magnification	6.5x21
Detection range / Lens Size	0.5 to 50 meters / starting from 0.25 lens size
Detection angle	40 degrees
Number of LEDs	2 Pcs (Green/Red)
Power Supply	3.7v charging Li-pol Battery (up to 3 Hours)
Dimensions	120x110x65 mm
System Weight	350 gr
