HIDDEN CAMERA DETECTOR

OR 2

Professional Hidden Camera Detector

OR 2 is a professional hidden camera detector designed to detect and locate any type of visible or hidden camera at distance of up to 50 meters.

The uniqueness of the OR 2 kit is a combination between four abilities:

- High quality binoculars with 6.5x21 magnification and large focusing range, allows examining objects in detail at distances up to 50m.
- Electronic system contains two special LEDs, green and red, which transmit a different light frequency that identifies any type of camera, visible and hidden (Pinhole / camouflage). When a camera lens is detected, the light reflection from the lens will sparkle.
- Mini modular flashlight with a powerful light intensity that can detect a different shade of the wall color for the purpose of detecting camouflage work in the wall.
- Headlamp that assists to technician in dark places during debugging test.

- **Technical Specifications:**

Magnification	6.5x21
Detection range	0.5 to 50 meters
Number of LEDs	2 Pcs (Green/Red)
Mode of Led / Flashlight	Continuous
Flashlight Lumens	600
Power Supply	LEDs: 3.7v Li-pol Battery (up to 3 Hours) Flashlight: 3.7v Li-pol Battery (up to 1 Hour)
Dimensions	120x110x65 mm, With Flashlight: 120x110x85
System Weight	350 gr, With Flashlight: 450 gr
