HIDDEN CAMERA DETECTOR

OR 2

Professional Hidden Camera Detector

OR 2 is a professional optic detector designed to detect any type of visible or hidden camera lens at a distance up to 100 meters and at an angle of up to 40°.

The uniqueness of the OR 2 is a combination between few abilities:

- High quality binoculars with 6.5x21 magnification and large focusing range, allow examining objects in detail at distances up to 100m
- A unique electronic system containing two special LEDs, green and red, that transmits a special light frequency that detects any type of camera lens, visible or hidden, active or not, by causing the camera's optics and sensor to sparkle and thus reveal itself.
- A mini, removable modular flashlight with powerful light intensity that can detect a different shade of the wall color for the purpose of detecting camouflage work in the wall and to illuminate dark areas.

- **Technical Specifications:**

Magnification	6.5x21
Detection range / Lens Size	0.5 to 100 meters, starting from 0.25 lens diameter size
Detection angle	Up to 40 degrees
Number of LEDs	2 (Green/Red)
Mode of Led	Continuous / Blinking
Mode of flashlight	Continuous, 600 Lumens
Power Supply	LEDs: 3.7v Li-pol Battery (up to 5 Hours) Flashlight: 3.7v Li-pol Battery (up to 1 Hour)
Dimensions	120x110x65 mm, With Flashlight: 120x110x85
System Weight	330 gr,
