# LC -300

**Professional Pole Camera**

The LC-300 Pole camera system is specifically designed for TSCM technicians to inspect hard-to-reach areas.

It utilizes a carbon fiber telescopic monopod that extends up to 3 meters, enabling technicians to access high ceilings and restricted spaces. The LC-300 features a 2MP 360° PTZ Panoramic pole camera whose direction can be controlled by small motors. The camera is equipped with powerful LED lighting, ensuring clear visibility even in dark environments. The camera's video feed is displayed on a high-quality monitor, and there is an option to record the footage onto SD card.

**Technical Specification:**

| | |
|---|---|
| Camera Dimension | 35x50mm |
| Camera Rotate | Horizontal 360° Vertical 360° |
| Optical Total Pixels | 1920 (H) x 1080 (V) |
| Lens & View Angle | 3.6mm F1.2 (H) 160° |
| Screen | 7-inch LCD screen |
| Sensitivity | 0.0001 Lux/F1.2 |
| Light Source | 8 Pcs LED |
| Pole Length | Fold 87.5 sm, Unfold:3.0m |
| Pole Weight | 1.5kg |
